About the Cover

This year's cover showcases how automation is driving Alberta's future through sustainability and innovation. The skyline reflects our province's industrial strength, while the circuitry symbolizes the efficiency, progress, and smart technology shaping tomorrow's automation industry. Together, it captures the vision of a sustainable and innovative Alberta.

Sustainability in this context goes beyond environmental goals. It represents smarter processes, safer systems, and long-term competitiveness — outcomes made possible by innovation in automation. The four icons — AI, cybersecurity, people, and sustainability — underscore the forces shaping Alberta's automation industry today and tomorrow.

Driving Alberta's Future: Sustainability & Innovation.

ISA EDMONTON SECTION

2025-2026 PRESIDENT'S MESSAGE

Thank you for the opportunity to serve as ISA Edmonton Section President for the 2025-2026 season. ISA has been a huge part of my career. In fact, every job I've had has come from a connection I've made through this organization!

I'm proud to have volunteered at the Society level leading the committee that founded ISA Young Professionals. I've also been an active ISA Edmonton Section Board Member serving as Alberta Directory of Automation Chair, Treasurer and President Elect. Another highlight has been mentoring in the ISA Edmonton Section Mentorship Program.

My presidency is inspired by the desire to dive deeper into the realm of giving back. Ultimately, how can I impact our Section's legacy?

Sustainability

Top of my agenda is sustainability. Looking back on my presidency, I want to be remembered for building on our past successes - while - bringing new ideas, fostering a renewed sense of community, building our Board by recruiting fresh faces and encouraging engagement, providing opportunities for personal and professional development, and finally, collaborating with other Sections.

New Website

Launched this past June, I'm excited about the fresh direction our website has given us. Come in, I encourage you to: say hello and learn what we're about, get involved - we have an abundance of opportunities for automation professionals and students, tap in to both our local and global resources, catch up by reading our blog stories, and reach out - we want to hear from you.

Happenings

Events are a big part of what we offer locally and you're invited. Our always sold-out ISA Edmonton Section Fall Classic Invitational kicks things off. Expect another packed-house for Student Industry Night in February and I can't wait to co-moderate our 2nd Women In Automation Luncheon this spring!

In addition to these staples, the now and future of the automation industry is focused on environmental impact, safety, big data, artificial intelligence and cybersecurity - watch for upcoming Technical Talks that cover these topics, and dig deeper into the latter with the freshly launched ISA Edmonton Section Operations Technology Cybersecurity Special Interest Group (OTCSIG).

I look forward to the next year of sustaining our Section with YOU...

Jackie Christensen

ISA CALGARY SECTION

2025-2026 PRESIDENT'S MESSAGE

I'd like to thank the ISA as a whole for inspiring my presidential journey, and the ISA Calgary Section for electing me. My inspiration to serve comes from a deep passion for industrial automation and a strong commitment to the automation community that has shaped my career.

After moving to Canada over a decade ago, I became a member of the ISA Calgary Section and for the past three years have been actively involved in various board positions. The resources, training, and community I found through ISA have played a defining role in shaping my career, and today, I am grateful for the chance to give back to the organization that has given me so much.

On the top of my agenda is strengthening our Section through connection. How do I plan to do this?

First, it's show time! I invite you to attend the ISA Calgary Section Show that takes place June 9 - 11, 2026 - our long-standing prime opportunity to connect where we'll be exploring the future of automation as it relates to these conference topics: operational technology cybersecurity, automation project management, and new technologies like artificial intelligence and open process automation.

Next, I'm excited to launch a Mentorship Program in November (thanks Matthew Rebus).

Additionally, I'm committed to build on Armaghan Yusuf's (Past President) and Greg Potter's (OTCSIG Chair) work by adding an Automation Project Management Special Interest Group (APMSIG) into the mix.

Finally, our 19th Annual Golf Tournament and Technical Talks are opportune events to network and learn. Together these will not only create valuable opportunities for knowledge-sharing and networking but also help us grow membership and build a stronger, more connected automation community.

We welcome everyone (member or not) to get involved. Please feel free to reach out anytime, follow us on LinkedIn, or connect with me directly.

Looking to Reduce your Methane Venting? We have Solutions!

ELIMINATOR Solar Air Compressor

- Class 1 Div. 1, 24v DC
- Produces 60SCFH @ 30psi. Uses 48Watts/Hr. @ 20% duty
- Oil less and maintenance free design. 100% duty cycle
- Class 1 Div. 1 controller with integrated metering
- 100% contained compressor - Contaminant free air

ELIMINATOR Solar Chemical Pump

- High efficiency electric drive unit eliminates fuel gas consumption and venting.
- Capable of an extremely wide injection rate without changing plunger size.
- Smart diagnostics to detect issues with the injection pump
- Class 1 Div. 1 – Completely self-contained
- Various I/O available for RTU integration.
- Retrofit a 5100 series pneumatic injector without changing any tubing!

ANALYTICAL

Our expertise in analytical solutions will assist in your system optimization for Liquid Analytical, Gas Quality, and Continuous Gas monitoring systems.

SAFETY & SECURITY

Local experts for everything from Wireless Asset Software, Portable Gas Detection, Fixed Gas Detection, Flame Detection, Control, to Leak Quantification.

CRITICAL POWER

Optimizing the Critical Power space with next-gen UPS Systems, Battery Monitoring & Chargers, AC/DC VFD's, Motors, Protection Disconnects and Distribution Panels.

ROTATING EQUIPMENT

We represent top-of-the-line NG, Oil-Free, Piston, Rotary and Vacuum Compressors. We also provide Air Treatment, Leak Detection, and Efficiency Quotient services.

AUTOMATION

Our automation solutions include Terminal Management, HMI, Flow Computing, RTU/PLC Packages, Controls and Distributed I/O, Conversion to isolation and Functional Safety.

VALVES & ACTUATION

We will equip your process with world class Valve and Actuation solutions. Our offerings encompass a full portfolio for control, throttling, isolation, and specialty applications, both in linear and rotary designs.

HEATING & THERMAL

We are focused on providing pre-packaged and complete combustion products, controls, and heating management systems. Delivering safe, compliant, and efficient thermal processes from commercial to industrial divisions.

FIELD INSTRUMENTS

Instrumentation is our forte. We supply Pressure, Temperature, Flow, Nuclear, Multiphase and Level Measurement products for various process conditions.

#TeamUpToImprove

Process improvement is ensuring plant availability while ensuring compliance.

In the oil and gas industry, ensuring highest safety and plant availability is crucial, while achieving decarbonization goals has also become a critical imperative. Our comprehensive portfolio and expertise enable process improvements that increase operational reliability and move us towards net zero targets.

HCS

Heaters, Controls and Sensors is located in London, Ontario CANADA

We design all kinds of process heaters for industrial applications.

MADE IN HOUSE

Our products include thermocouples and sensors.

- Control panels designed with CSA/CUL approvals.
- We stock controllers for various applications, all with CSA approvals (we can cross reference any controllers).

Give us a call at
1-800-279-9912
to discuss all your process applications,
or visit us at heatersf.com.

Proudly owned and operated

	Variable area flow meters, Coriolis mass flow, thermal mass flow and pressure control technologies (pressure transmitters and more) to improve your critical processes.
	The premier pinch valves (1”– 40”) for abrasive or aggressive media. Heavy duty & general line pinch valves. Low maintenance elastomer check valves.
	Peristaltic pumps for pumping slurries, dry or aggressive media from 0–440 GPM. High efficiency PC pumps. Metering pumps with outstanding turndown.
	Valmet develops and manufactures wet & dry filter fabrics for the mining, chemical, pulp and paper industries, as well as for energy production, waste processing plants, and food manufacturing.
	Key Instruments delivers a selection of versatile plastic, variable area flowmeters. Durability is the result of precision machined, acrylic body blocks that can handle demanding projects and panel mounting.
	Positive Displacement Oval Gear Flow Meters, Retractable Hose Reels and Grease / Oil / Fuel Fluid Handling Products for the Petrochemical, agriculture, automotive, chemical, industrial, general process, marine, & mining industries.
	Clamp-on ultrasonic flow meters, clamp-on BTU Meters for energy, clamp-on doppler flow meters, non-invasive, no interruption to process & no downtime, wide range of portable & permanent meters for any liquid.
	Highly accurate Tempress sensors for monitoring pressure and temperature. Tempress have manufactured instruments for process and manufacturing industries worldwide for more than 60 years.
